Subject: 29 Bypass Estimate

Jake is sending us a complete estimate that PB worked up just prior to ending their contract (3/2000). It will be in metric with no dollar amounts. VDOT will have to assign unit cost to the summaries. We need to have someone in S&C convert from metric to imperial and put the quantities into TRANSPORT. The TRANSPORT estimate should be more accurate than anything in PCES. Can you clear this through Mark and if so, we can get someone on it first thing in the morning? This should give us a much better idea of what we have cost wise.

I also talked with Giometti and he confirmed that his estimate is very generic in nature and does not account for anything out of the ordinary (rock, special design items, etc...).
